Which area are you working in?

| | | |
|-------------------------------------|----|-----|
| Computing center staff (consulting) | 4 | 14% |
| Computing Center staff (sysadmin) | 1 | 3% |
| Domain scientist (developer) | 9 | 31% |
| Domain scientist (user) | 3 | 10% |
| Programmer / developer | 18 | 62% |
| Management (administrative) | 1 | 3% |
| Management (research) | 4 | 14% |
| Other | 6 | 21% |

Which areas of science do the codes come from that you are working on?

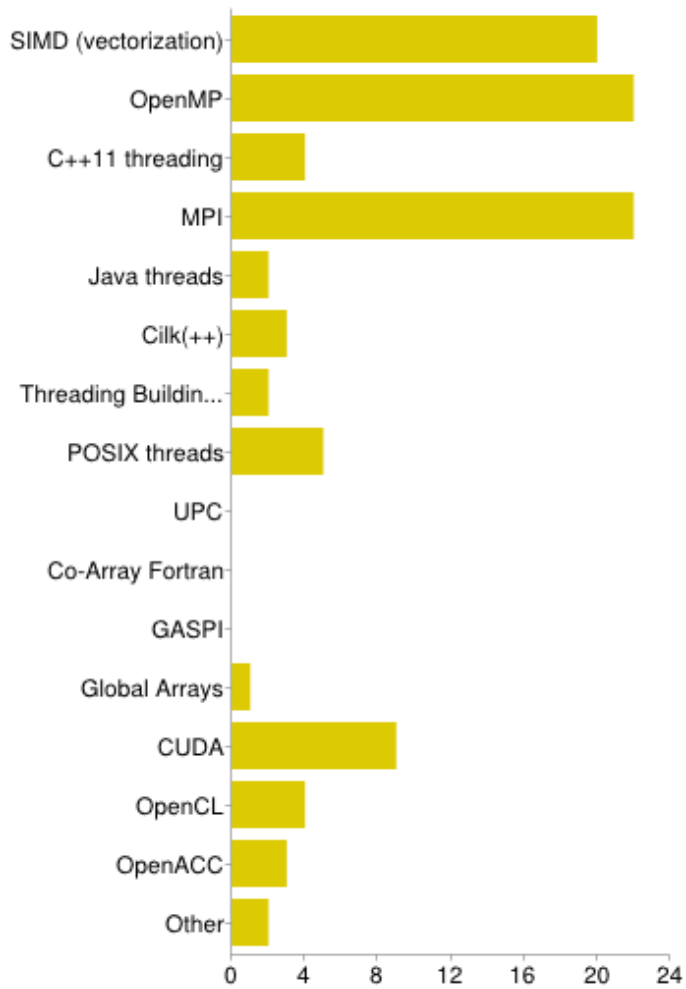

| | | |
|------------------------------|-----------|-----|
| Mathematics | 10 | 34% |
| Physics | 17 | 59% |
| Chemistry | 8 | 28% |
| Materials science | 5 | 17% |
| Computational fluid dynamics | 9 | 31% |
| Structural mechanics | 5 | 17% |
| Biological systems | 4 | 14% |
| Finance / economics | 2 | 7% |
| Social sciences | 1 | 3% |
| Other | 8 | 28% |

What is the programing language that you mostly deal with when optimizing code?

| | | |
|---------------------------------|-----------|-----|
| Fortran 77 | 7 | 24% |
| Fortran 90/95 | 15 | 52% |
| Fortran 2003 | 3 | 10% |
| Co-Array Fortran / Fortran 2008 | 0 | 0% |
| C++98 | 20 | 69% |
| C++11 | 13 | 45% |
| C | 19 | 66% |
| UPC | 0 | 0% |
| Python | 4 | 14% |
| Java | 2 | 7% |
| C# | 0 | 0% |
| Chapel | 0 | 0% |
| X10 | 0 | 0% |
| Other | 2 | 7% |

What is the parallel programming model that you mostly deal with when optimizing code?

| | | |
|---------------------------------|-----------|-----|
| SIMD (vectorization) | 20 | 69% |
| OpenMP | 22 | 76% |
| C++11 threading | 4 | 14% |
| MPI | 22 | 76% |
| Java threads | 2 | 7% |
| Cilk(++) | 3 | 10% |
| Threading Building Blocks (TBB) | 2 | 7% |
| POSIX threads | 5 | 17% |
| UPC | 0 | 0% |
| Co-Array Fortran | 0 | 0% |
| GASPI | 0 | 0% |
| Global Arrays | 1 | 3% |
| CUDA | 9 | 31% |
| OpenCL | 4 | 14% |
| OpenACC | 3 | 10% |
| Other | 2 | 7% |

Are your code optimizations centered on the single core, node, or highly parallel level?

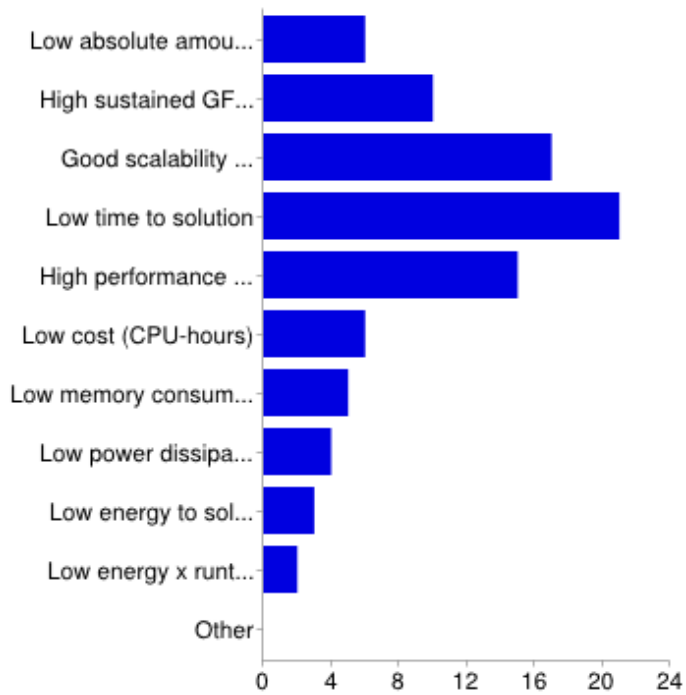

| | | |
|---|-----------|-----|
| Single core (sequential) | 15 | 52% |
| Single node/device (e.g., CPU socket, multiple CPU sockets, GPGPU, other accelerator) | 22 | 76% |
| Highly parallel (distributed memory) | 20 | 69% |

What is/are the target architecture(s) for which you optimize code?

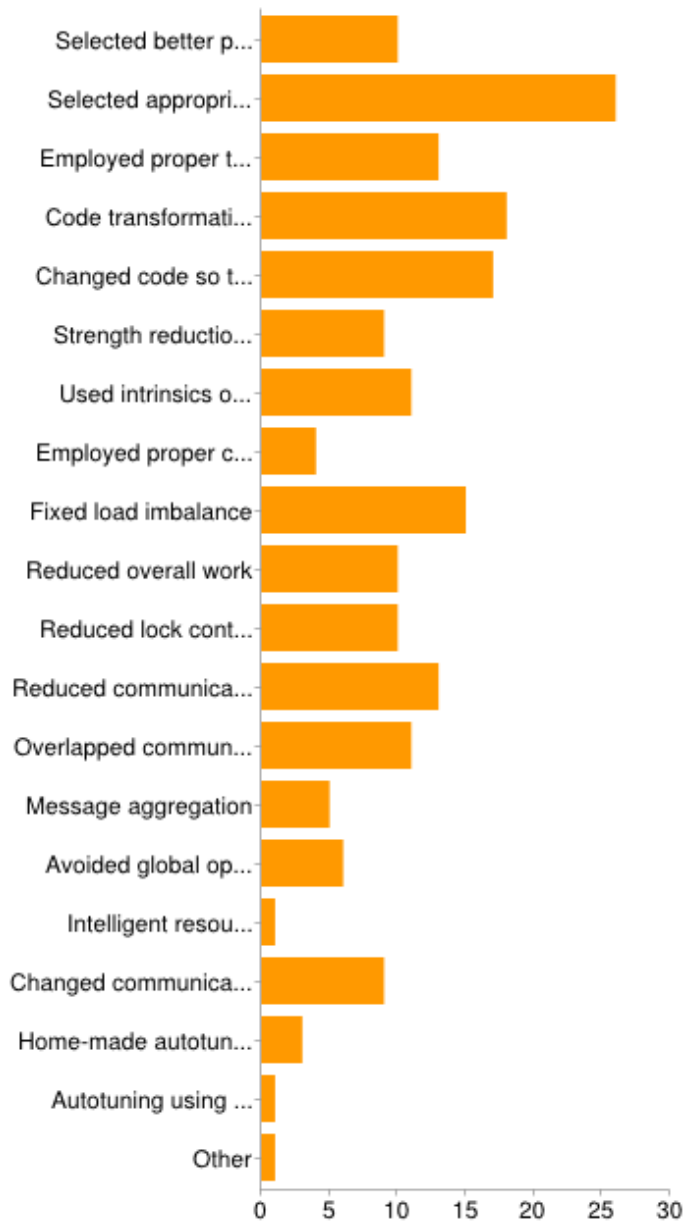

| | | |
|---------------------------------------|-----------|-----|
| Standard Intel/AMD x86 chips/clusters | 26 | 90% |
| Cray MPP | 1 | 3% |
| IBM Power | 2 | 7% |
| IBM Blue Gene | 2 | 7% |
| Large shared memory systems | 2 | 7% |
| AMD GPGPUs | 3 | 10% |
| Nvidia GPGPUs | 9 | 31% |
| Intel Xeon Phi | 10 | 34% |
| Low power/embedded | 2 | 7% |
| Mobile devices | 0 | 0% |
| Other | 3 | 10% |

What are the typical target metrics you optimize for?

| | | |
|---|-----------|-----|
| Low absolute amount of work | 6 | 21% |
| High sustained GFlop/s rate | 10 | 34% |
| Good scalability (large speedup) | 17 | 59% |
| Low time to solution | 21 | 72% |
| High performance (work/time) | 15 | 52% |
| Low cost (CPU-hours) | 6 | 21% |
| Low memory consumption | 5 | 17% |
| Low power dissipation (i.e., low sustained Watts) | 4 | 14% |
| Low energy to solution | 3 | 10% |
| Low energy x runtime (or a variant thereof) | 2 | 7% |
| Other | 0 | 0% |

If you have ever optimized code performance, what approach(es) did you use so far to improve it?

| | | |
|---|-----------|-----|
| Selected better programming language / programming model / library | 10 | 34% |
| Selected appropriate compiler options | 26 | 90% |
| Employed proper thread/process affinity | 13 | 45% |
| Code transformations: blocking, unrolling, loop fusion, etc. | 18 | 62% |
| Changed code so the compiler does a better job | 17 | 59% |
| Strength reduction (avoid expensive operations) | 9 | 31% |
| Used intrinsics or assembly language | 11 | 38% |
| Employed proper ccNUMA page placement | 4 | 14% |
| Fixed load imbalance | 15 | 52% |
| Reduced overall work | 10 | 34% |
| Reduced lock contention/serialization | 10 | 34% |
| Reduced communication volume/frequency | 13 | 45% |
| Overlapped communication with computation | 11 | 38% |
| Message aggregation | 5 | 17% |
| Avoided global operations | 6 | 21% |
| Intelligent resource management (e.g., overlapping codes with different requirements to the hardware) | 1 | 3% |
| Changed communication pattern | 9 | 31% |
| Home-made autotuning (e.g., using scripts) | 3 | 10% |

Autotuning using an available tool

0 0%

Have you ever used performance tools for optimizing applicaton code?

Yes 22 76%

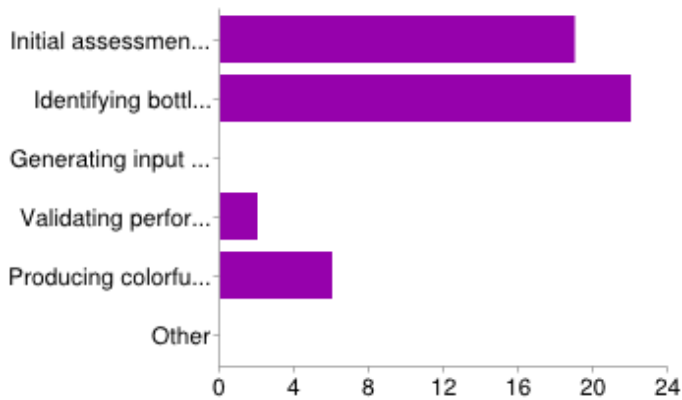

No 3 10%

If you have used performance tools, which ones?

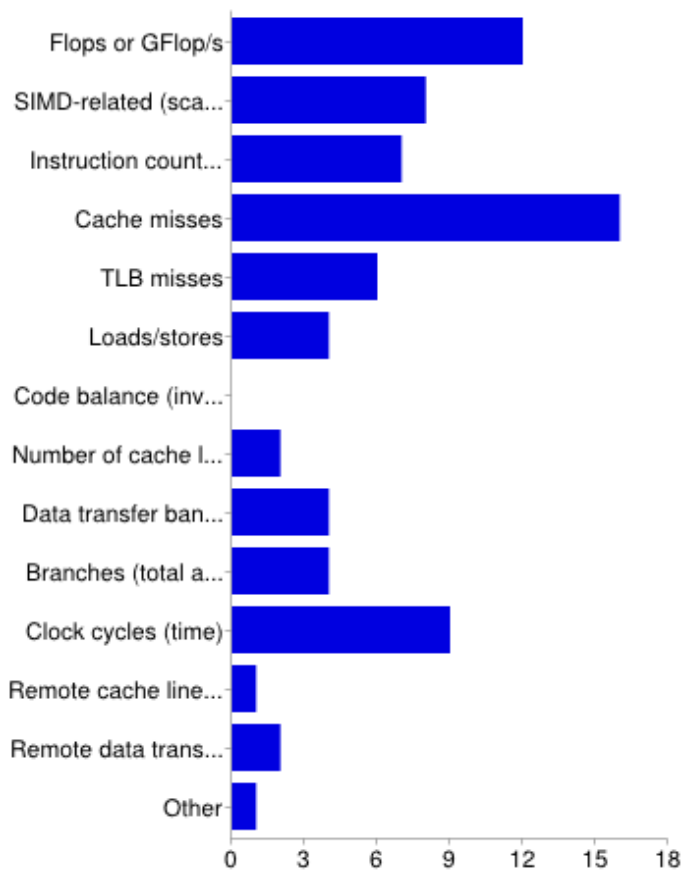

| | | |
|------------------------------------|-----------|-----|
| SCALASCA | 3 | 10% |
| VAMPIR | 3 | 10% |
| Intel Trace Analyzer/Collector | 1 | 3% |
| DIMEMAS | 1 | 3% |
| Paraver | 1 | 3% |
| Allinea MAP | 4 | 14% |
| PerfExpert | 2 | 7% |
| ThreadSpotter | 0 | 0% |
| Intel Amplifier (VTune) | 8 | 28% |
| TAU | 8 | 28% |
| PAPI | 10 | 34% |
| LIKWID | 1 | 3% |
| gprof or other compiler-based tool | 14 | 48% |
| Other | 8 | 28% |

If you use tools, what do you use them for?

| | | |
|---|-----------|-----|
| Initial assessment/profiling | 19 | 66% |
| Identifying bottlenecks | 22 | 76% |
| Generating input for statistical modeling | 0 | 0% |
| Validating performance models | 2 | 7% |
| Producing colorful graphs | 6 | 21% |
| Other | 0 | 0% |

If you use hardware performance counter measurements, what events/metrics do you look at?

| | | |
|---|-----------|-----|
| Flops or GFlop/s | 12 | 41% |
| SIMD-related (scalar vs. packed instructions) | 8 | 28% |
| Instruction count / IPC | 7 | 24% |
| Cache misses | 16 | 55% |
| TLB misses | 6 | 21% |

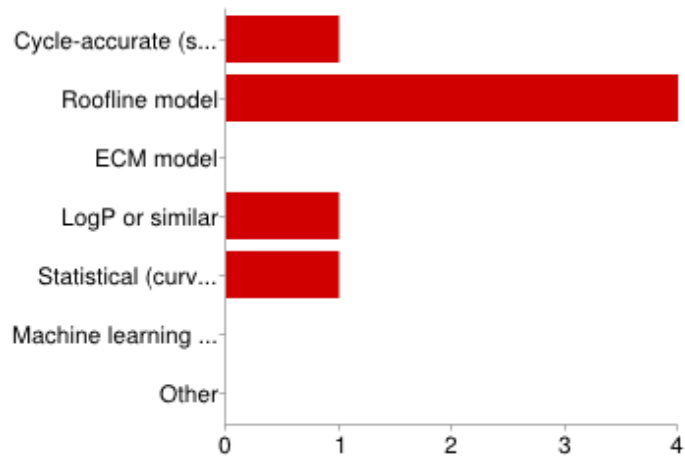

| | | |
|--|---|-----|
| Loads/stores | 4 | 14% |
| Code balance (inverse intensity) | 0 | 0% |
| Number of cache lines (data volume) | 2 | 7% |
| Data transfer bandwidths | 4 | 14% |
| Branches (total and mispredicted) | 4 | 14% |
| Clock cycles (time) | 9 | 31% |
| Remote cache line evicts | 1 | 3% |
| Remote data transfers (cross-NUMA domains) | 2 | 7% |
| Other | 1 | 3% |

Do you use performance models in your optimization efforts?

| | | |
|--|----|-----|
| Yes | 6 | 21% |
| No | 12 | 41% |
| What is this "performance model" stuff anyway? | 7 | 24% |

If you use performance models, which ones?

| | | |
|--|---|-----|
| Cycle-accurate (simulation) | 1 | 3% |
| Roofline model | 4 | 14% |
| ECM model | 0 | 0% |
| LogP or similar | 1 | 3% |
| Statistical (curve fitting, extrapolation) | 1 | 3% |
| Machine learning based | 0 | 0% |
| Other | 0 | 0% |

Do you think you would have interesting optimization case studies to share at a dedicated workshop?

| | | |
|--|-----------|-----|
| Yes | 8 | 28% |
| No | 9 | 31% |
| Probably, but would require substantial effort | 10 | 34% |

Have you ever had a paper rejected because it was "just" an optimization case study with "no novelty"?

| | | |
|-----|-----------|-----|
| Yes | 7 | 24% |
| No | 19 | 66% |

How would you rate the usefulness of an "Optimization community" for your daily work?

| | | |
|---|-----------|-----|
| 1 | 0 | 0% |
| 2 | 0 | 0% |
| 3 | 3 | 10% |
| 4 | 12 | 41% |
| 5 | 13 | 45% |

Your overall opinion about this BoF?

| | | |
|--|----|-----|
| Useless. Total waste of time. | 0 | 0% |
| Mildly entertaining. | 0 | 0% |
| Moderately interesting, learned something new. | 6 | 21% |
| Very interesting. More of this! | 18 | 62% |
| Best BoF ever! | 2 | 7% |
| Other | 1 | 3% |

Anything you would like to share? Suggestions, comments about this BoF?

I really like the research that comes out of the RRZE et al. group. One small criticism of the ECM model: the assumption that there is no overlap of traffic between the levels of the cache always gives me pause. I wish you could get an official confirmation/refutation of this from Intel. Congratulations, and thanks for the amazing BoF

Enjoyed the session, but it wasn't really a BoF. Instead it was just a series of short presentations. If billed as a BoF again next year, should incorporate more time for discussion and audience participation.

needs more complex examples

a tidbit of more general optimization strategies for various types of code.

Would like to see more low-level optimization techniques that are closer to the metal

Liked the fact it wasn't all about MPI
